

Assessment Number: 1	Assessment Date: 16/6/20
Plant Type: 4T Twin Drum Roller Plant Make: Dynapac Plant Model: CC1300C	Assessment Facilitated by: Leigh Evans (Admin/Accounts Manager)
Asset/Fleet/Rego No: DYNACC1300 Plant Serial No. A020156	Assessment Participants: Lachlan Horton (Yard Manager)
Plant Owner Name: Northern Hire Group	Initial Assessment
Follow up based on change to:	
Use of plant System of work Plant Environment	New or additional information ☐ Plant through modification ☐
Is the plant designed to perform the task?  Yes X  No	
Has the plant been modified from the original condition? Yes ☐ No X	χ
Is the plant in good working condition and free of weeds & Yes X No [ mud?	
All identified action items closed out/addressed (plant Yes X No [ checks)?	
Is the plant safe to operate? (On completion of PHA and Yes X No action closure)	
	Date: Signature:

Risk / Opportunity Rating Table (see <u>Risk Management Consultation</u>
<u>Process Appendix</u> for a full description of Risk Consequence, Opportunity Consequence and Likelihood Ratings)

	Almost Certain	D	С	В	Α	A			
ting	Likely	D	D	С	В	Α			
Likelihood rating	Possible	E	D	С	С	В			
Likeli	Unlikely	E	E	D	С	В			
	Rare	Е	Е	D	D	С			
		1	2	3	4	5			
		Consequence rating							

#### **Action and Approval Scheme**

These suggested timings and tolerance levels in the Action Table will be overridden by specific policies of the company that either dictate shorter timeframes for corrective action or zero tolerance. For example, the company has a zero tolerance policy for Safety and Environmental risks.

The decision to tolerate a risk or capture a opportunity should be based on a consideration of:

Whether the risk / opportunity is being controlled to a level that is reasonably achievable;

Whether it would be cost-effective to further control risk or capture the opportunity;

Whether user wishes to tolerate risks / opportunities of that type

#### **Action Table**

Residual risk / opp level	Suggested action	Timing of status report and management plans	Authority for continued toleration or improvement of residual rating.
A	Take action to eliminate or implement additional controls to reduce it to acceptable level (ALARP/SFAIRP).  "Onsite activities" — Intolerable and activity must not commence	Report as soon as practicable. Normally within hours.	Senior Executive Manager Plus Project Manager / Project Leadership Team
В	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Corporate Management review	Manage and re-evaluate risk / opportunity to allow reporting days  Manage and re-evaluate risk / opportunity to allow reporting every two weeks	General Manager and / or Project Manager / Project Leadership Team
С	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Site Management review	Manage and re-evaluate risk / opportunity to allow reporting monthly	"Specialist" Manager, eg Construction or Design Manager
D	Will still require attention within existing operations to reduce to ALARP/SFAIRP. "Onsite Activities" – Site Management must determine appropriate level of management and supervision prior to commencement of activity	Manage and re-evaluate risk / opportunity to allow reporting every quarter	Team Leader
E	Lower priority. May be tolerable	Monitor, manage and carryout activity in accordance with identified controls	Supervisor
