

Acrow Prop

Safety Precautions

- Ensure pin is fully engaged on both sides of the lifting ring
- **WARNING:** Jam hazard when raising or lowering. Extreme caution required. Wear leather gloves and take care not to jam fingers.
- It is the Hirer's responsibility to adequately brace Acrow Props which are used in any load carrying capacity.
- Ensure height and loading specifications are adhered to.
- Use appropriate Personal Protection Equipment (PPE)
- Do not use if fatigued, impaired or under the influence of alcohol, medication/drugs.
- Check controls for proper response, Do not use if fault detected.
- Do not wipe any plastic parts with solvents such as petrol, thinners, alcohol and ammonia as they will damage parts. Wipe with a soft cloth lightly dampened with soapy water only.
- Always use the right tools for the job. Never force a tool or attachment to do a job for which it was not designed.
- Ensure all guards are in place and in working order.
- Keep loose clothing, jewellery, hair and other body parts away from moving parts.
- Do not overreach. Ensure proper footing and balance.
- Ensure work area is well lit.
- Keep non-essential persons and animals clear of work area.
- Check the equipment at the end of each day for signs of damage/defects and wear.
