

Assessment Number: 1	Assessment Date: 9/7/19
Plant Type: 2.5T Telehandler Plant Make: JCB Plant Model: 525-60 Hi Viz	Assessment Facilitated by: Leigh Evans (Admin/Accounts Manager)
Asset/Fleet/Rego No: TELHAN2.5 Plant Serial No. JCB5A41RVG204853	Assessment Participants: Leah Ford (Yard Manager)
Plant Owner Name: Northern Hire Group	Initial Assessment
Follow up based on change to:	
Use of plant System of work Plant Environment [New or additional information ☐ Plant through modification ☐
Is the plant designed to perform the task? Yes X No	
Has the plant been modified from the original condition? Yes ☐ No	x
Is the plant in good working condition and free of weeds & Yes X No mud?	
All identified action items closed out/addressed (plant Yes X No checks)?	
Is the plant safe to operate? (On completion of PHA and Yes X No action closure)	
	Date: Signature:

Revision No: 1

Issue Date: 9/7/2019

Risk / Opportunity Rating Table (see <u>Risk Management Consultation</u>
<u>Process Appendix</u> for a full description of Risk Consequence, Opportunity Consequence and Likelihood Ratings)

	Almost Certain	D	С	В	Α	Α
ting	Likely	D	D	С	В	Α
Likelihood rating	Possible	Е	D	С	С	В
Likeli	Unlikely	E	E	D	С	В
	Rare	Е	E	D	D	С
		1	2	3	4	5
			Cons	sequence ra	iting	

Action and Approval Scheme

These suggested timings and tolerance levels in the Action Table will be overridden by specific policies of the company that either dictate shorter timeframes for corrective action or zero tolerance. For example, the company has a zero tolerance policy for Safety and Environmental risks.

The decision to tolerate a risk or capture a opportunity should be based on a consideration of:

Whether the risk / opportunity is being controlled to a level that is reasonably achievable;

Whether it would be cost-effective to further control risk or capture the opportunity;

Whether John Holland wishes to tolerate risks / opportunities of that type

Action Table

Residual risk / opp level	Suggested action	Timing of status report and management plans	Authority for continued toleration or improvement of residual rating.
A	Take action to eliminate or implement additional controls to reduce it to acceptable level (ALARP/SFAIRP). "Onsite activities" — Intolerable and activity must not commence	Report as soon as practicable. Normally within hours.	Senior Executive Manager Plus Project Manager / Project Leadership Team
В	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Corporate Management review	Manage and re-evaluate risk / opportunity to allow reporting days Manage and re-evaluate risk / opportunity to allow reporting every two weeks	General Manager and / or Project Manager / Project Leadership Team
С	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Site Management review	Manage and re-evaluate risk / opportunity to allow reporting monthly	"Specialist" Manager, eg Construction or Design Manager
D	Will still require attention within existing operations to reduce to ALARP/SFAIRP. "Onsite Activities" – Site Management must determine appropriate level of management and supervision prior to commencement of activity	Manage and re-evaluate risk / opportunity to allow reporting every quarter	Team Leader
E	Lower priority. May be tolerable	Monitor, manage and carryout activity in accordance with identified controls	Supervisor

Revision No: 1

Issue Date: 9/7/2019

Potential Hazards	ŀ	Hazar	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
1 Are there any specific		N	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
Are there any specific warnings or conditions (manufacturers or other) relating to potential hazards from the operation of the item of plant?	Y			Potential Hazard	Refer to Safe Use Guide (attached) Operator Manual & site specific controls					
 Refer to technical or operating manuals, SOPs, safe use instructions List any relevant safety warning hazards & controls 										
2. Are there any COMMUNICATION requirements in relation to the safe operation of the plant? Active signalling processes. Point to point communications. Whistle	Y			Potential Hazard	Refer to Safe Use Guide (attached) Operator Manual & site specific controls					
Spotter (with/without whistles)Flag signallingLabels and signage										

Revision No: 1 Page 3 of 24

Potential Hazards	ŀ	Hazar	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
3. Can anyone be	Υ	N	N/ A	Dood Hazara	001111010		on Plant	Level	By: (Name and Date)	(Name and Date)
3. Can anyone be ENTANGLED in the plant? Hair or other body parts caught in moving parts PPE caught in moving parts Isolation devices Warning decals Guarding Rotating parts Emergency stops	Y			Entanglement risk from moving parts	Exclusion zones and PPE (goggles, mask, protective clothing) will be required and a risk assessment must be undertaken onsite to determine PPE and controls. Machine must be isolated before cleaning or maintenance. Body parts and loose items such as jewellery, fabric, strapping, cables, wires etc. to be kept clear of moving parts.

Potential Hazards	ŀ	Hazaı		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	N	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
13. Are there ERGONOMIC - MANUAL HANDLING hazards associated with the plant? Poor posture Repetitive or sustained movements Awkward positions Strained movements Poorly designed seating Access and egress Access for maintenance Routine inspections and adjustments	Y			Potential Hazard - Strains	All controls including all levers, buttons, pedals, switches etc, are placed near the operator work position and are easy to reach and operate during the execution of the operator's normal duties. This applies for all persons within the 95th percentile of the normal population distribution.					
14. Are there ERGONOMIC	Y			Potential Hazard	All controls including all levers, buttons, pedals, switches etc. are clearly labelled as to their purpose and method of operation. These labels must be maintained in a clean and serviceable condition at all times					

Revision No: 1 Page 14 of 24

Potential Hazards		Hazaı		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	N	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
15. Are there specific requirements for ISOLATION of energy sources?	Y			Potential Hazard	Please refer to Operator Manual					
 Hydraulic pressure Compressed gases Electrical feeds/capacitors Motive power systems Suspended loads Operation by two or more persons 										
16. Can unplanned LOSS of POWER create a hazard?	Y			Potential Hazard	Please refer to Operator Manual					
 Engine shutdown Loss of electrical supply Loss of steering systems Ability to apply brakes and stop Ability to lower suspended loads 										
 17. Can anyone be SUFFOCATED? Lack of oxygen Contaminated atmosphere Confined spaces Spaces where air flow is 		Z								
inadequate 18. Does operation of the plant cause extreme TEMPERATURE changes? • Fire • Burns through conduction • Convection • Cryogenic burns • Operation in extreme heat or cold	Y			Potential Hazard	Observe local fire restrictions and regulations. Do not drive vehicle in areas of high risk during declared Fire Danger Period.

Potential Hazards	ı	Hazaı		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	N	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 19. Can a FIRE occur? Friction Ingress of materials/fluids Build-up of materials/lubricants Fuels Fire extinguisher 	Y			Potential Hazard	Fire extinguisher(s) to AS 1841 must be present and fully functional and serviceable at all times. They must be readily accessible to the operator. Regular inspections must also be carried out in accordance with the manufacturer's requirements and AS 1851					
20. Can certain WEATHER conditions create a hazard? Hypothermia / extreme cold Heat stroke / extreme hot Wet conditions Electrical storms Dirt & mud on roads at egress points	Y			Potential Hazard	Please refer to Operator Manual. Observe local weather conditions and warnings.					
21. Does VIBRATION of the plant create a hazard? Plant becomes unstable Causes physical problems for the operator whilst operating Vibration of equipment Operation could cause unacceptable vibration levels in nearby structures	Y			Potential Hazard to operator over prolonged use	Modify work methods to reduce exposure

27. Can the plant become UNSTABLE during operation? Working on uneven / unstable ground Shifting load Lack of plant support Outriggers	Y		Potential Hazard	A Roll Over Protective Structure (ROPS) to I SO 3471, I SO 12117.1 or 2, AS 2294 or AS 4987 is fitted to this item of plant. A permanent label stating this standard must be attached to the structure at all times. This structure provides a safety envelope during a rollover. A warning label re: wearing of seat belts at all times whilst this item of plant is in operation and accordingly seat belts must be worn at all times during operation. The rated capacity chart fitted for lifting operations has a maximum level angle which must never be exceeded during lifting operations. Operators must not exceed the rated capacity at any time during operation. Isolate plant. A site specific			
				risk assessment
