

Assessment Number: 1		A	Assessment Date: 4/7/19
Plant Type:5T ExcavatorPlant Make:KobelcoPlant Model:SK55SRX		A	Assessment Facilitated by: Leigh Evans (Admin/Accounts Manager)
Asset/Fleet/Rego No: KOBSK55SRX Plant Serial No. PS03-09657		A	Assessment Participants: Leah Ford (Yard Manager)
Plant Owner Name: Northern Hire Group		l	nitial Assessment Follow up Assessment (See below)
Follow up based on change to:			
Use of plant 🗌 System of work 🗌 Plant	Environmer	nt 🗌	New or additional information Plant through modification
Is the plant designed to perform the task?	Yes X I	No 🗌	
Has the plant been modified from the original condition?	Yes 🗌 🛛 I	No X	
Is the plant in good working condition and free of weeds & mud?	Yes X I	No 🗌	
All identified action items closed out/addressed (plant checks)?	Yes X I	No 🗌	
Is the plant safe to operate? (On completion of PHA and action closure)	Yes X I	No 🗌	
			Date: Signature:

Risk / Opportunity Rating Table (see <u>Risk Management Consultation</u>

<u>Process Appendix</u> for a full description of Risk Consequence, Opportunity Consequence and Likelihood Ratings)

Action and Approval Scheme

These suggested timings and tolerance levels in the Action Table will be overridden by specific policies of the company that either dictate shorter timeframes for corrective action or zero tolerance. For example, the company has a zero tolerance policy for Safety and Environmental risks.

The decision to tolerate a risk or capture a opportunity should be based on a consideration of:

Whether the risk / opportunity is being controlled to a level that is reasonably achievable;

Whether it would be cost-effective to further control risk or capture the opportunity;

Whether John Holland wishes to tolerate risks / opportunities of that type

Action Table

Residual risk / opp level	Suggested action	Timing of status report and management plans	Authority for continued toleration or improvement of residual rating.
A	Take action to eliminate or implement additional controls to reduce it to acceptable level (ALARP/SFAIRP). "Onsite activities" – Intolerable and activity must not commence	Report as soon as practicable. Normally within hours.	Senior Executive Manager Plus Project Manager / Project Leadership Team
В	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Corporate Management review	Manage and re-evaluate risk / opportunity to allow reporting days Manage and re-evaluate risk / opportunity to allow reporting every two weeks	General Manager and / or Project Manager / Project Leadership Team
с	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Site Management review	Manage and re-evaluate risk / opportunity to allow reporting monthly	"Specialist" Manager, eg Construction or Design Manager
D	Will still require attention within existing operations to reduce to ALARP/SFAIRP. "Onsite Activities" – Site Management must determine appropriate level of management and supervision prior to commencement of activity	Manage and re-evaluate risk / opportunity to allow reporting every quarter	Team Leader
E	Lower priority. May be tolerable.	Monitor, manage and carryout activity in accordance with identified controls	Supervisor

Revision No: 1

Potential Hazards	ential Hazards		_	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:

12. Can anyone using or near the plant SLIP, TRIP or FALL?	Y			Potential Hazard	All personnel must –					
 Uneven surface Fall from a height Weather conditions 					1. Always face the item of plant during access and egress.					
 Slippery surfaces 					2. Always maintain three points of contact during access and egress.					
					3.Ensure the steps are clean.					
					4. Never jump off machine.					
					All controls including all levers, buttons, pedals, switches etc. must be kept non-slip and free from damage at all times.					
					A site specific risk assessment must be undertaken by client prior to operating plant					

Potential Hazards	I	Haza		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 13. Are there ERGONOMIC MANUAL HANDLING hazards associated with the plant? Poor posture Repetitive or sustained movements Awkward positions Strained movements Poorly designed seating Access and egress Access for maintenance Routine inspections and adjustments 	Y			Potential Hazard - Strains	All controls including all levers, buttons, pedals, switches etc, are placed near the operator work position and are easy to reach and operate during the execution of the operator's normal duties. This applies for all persons within the 95th percentile of the normal population distribution.					
 14. Are there ERGONOMIC OPERATING CONTROL hazards associated with the plant? Difficult to understand Inappropriate colouring Function not identified Inappropriate controls & switches Access and egress Labelling of controls and indicators Variation in operators Operation by two or more persons 	Y			Potential Hazard	All controls including all levers, buttons, pedals, switches etc. are clearly labelled as to their purpose and method of operation. These labels must be maintained in a clean and serviceable condition at all times

	Υ	Ν	N/ A	Doombo Hazara	Controlo		on Plant	Level	By: (Name and Date)	(Name and Date)
15. Are there specific requirements for ISOLATION of energy sources?	Y			Potential Hazard	Please refer to Operator Manual					
 Hydraulic pressure Compressed gases Electrical feeds/capacitors Motive power systems Suspended loads Operation by two or more persons 										
16. Can unplanned LOSS of POWER create a hazard?	Y			Potential Hazard	Please refer to Operator Manual					
 Engine shutdown Loss of electrical supply Loss of steering systems Ability to apply brakes and stop Ability to lower suspended loads 										
 17. Can anyone be SUFFOCATED? Lack of oxygen Contaminated atmosphere Confined spaces Spaces where air flow is inadequate 		Ν								
18. Does operation of the plant cause extreme TEMPERATURE changes?		Ν								
 Fire Burns through conduction Convection Cryogenic burns Operation in extreme heat or cold 										

Potential Hazards	I	Hazar	-	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 19. Can a FIRE occur? Friction Ingress of materials/fluids Build-up of materials/lubricants Fuels Fire extinguisher 	Y			Potential Hazard	Fire extinguisher(s) to AS 1841 must be present and fully functional and serviceable at all times. They must be readily accessible to the operator. Regular inspections must also be carried out in accordance with the manufacturer's requirements and AS 1851					
 20. Can certain WEATHER conditions create a hazard? Hypothermia / extreme cold Heat stroke / extreme hot Wet conditions Electrical storms Dirt & mud on roads at egress points 	Y			Potential Hazard	Please refer to Operator Manual					
 21. Does VIBRATION of the plant create a hazard? Plant becomes unstable Causes physical problems for the operator whilst operating Vibration of equipment Operation could cause unacceptable vibration levels in nearby structures 	Y			Potential Hazard to operator over prolonged use	Modify work methods to reduce exposure					

Potential Hazards	I	Haza		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
22. Can the plant emit toxic FUMES or VAPOURS?	Y			Potential Hazard from exhaust fumes	Do not use in enclosed spaces.					
 Exhaust fumes Chemicals Haz chemicals/DG's 					Ensure adequate ventilation					
 23. Carry out NOISE survey on page 14. Is the plant noisy? Emit >85 dBA at the operator Effects operator communication Noise impacts on community during out-of-hours work (including reversing beepers) 	Y			Potential hazard with prolonged use	A site specific risk assessment must be undertaken to determine PPE and controls.					
 24. Carry out the LIGHT survey on page 14. Is there poor visibility At the controls At the task Darkens surrounding areas Light impacts on community or sensitive natural environment during out-of-hours work 			N/ A							
 25. Does the plant emit RADIATION? Eg X-rays EMR Laser 		N								

Potential Hazards	ł	lazar	d	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Y	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 26. Can operation of the plant create DUST? Explosive atmosphere Breathing hazard Reduced visibility Nuisance dust at nearby community Impact on local flora and fauna Loss of topsoil and spread of weeds and pathogens 	Y			Exposure to hazardous dust	Site risk assessment must be undertaken by client to ensure hazardous dust is not disturbed by plant/task (e.g. asbestos) Exclusion zones and PPE (goggles, mask, protective clothing) will be required and a risk assessment must be undertaken onsite to determine PPE and controls					

 27. Can the plant become UNSTABLE during operation? Working on uneven / unstable ground Shifting load Lack of plant support Outriggers 	Y		Potential Hazard	A Roll Over Protective Structure (ROPS) to I SO 3471, I SO 12117.1 or 2, AS 2294 or AS 4987 is fitted to this item of plant. A permanent label stating this standard must be attached to the structure at all times. This structure provides a safety envelope during a rollover. A warning label re: wearing of seat belts at all times whilst this item of plant is in operation and accordingly seat belts must be worn at all times during operation. The rated capacity chart fitted for lifting operations has a maximum level angle which must never be exceeded during lifting operations. Operators must not exceed the			
				rated capacity at any time during operation. Isolate plant.			
				A site specific risk assessment			

Potential Hazards	I	Hazar	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Y	Ν	N/ A	Describe Hazard	Controls	ourient hisk Level	on Plant	Level	By: (Name and Date)	(Name and Date)
					must be undertaken by client onsite to determine PPE and controls					
 28. Could LOSS of LOAD occur? Failure of ropes/slings Overloading Entanglement in surrounding structures Maintenance requirements 	Ŷ			Potential Hazard	Refer to Operator manual for pre- operational checks, maintenance & load capacity					
 29. Is there anything in the SURROUNDING ENVIRONMENT that may produce a hazard? Power lines Low ceiling Other plant Storage areas Co-located equipment Isolation requirements Potential for flash flooding if operating adjacent to waterways Operating in known areas of weeds, pathogens or contamination Operating in sensitive environments requiring protection from offsite weeds/pathogens or spills 	Y			Potential Hazard	A site specific risk assessment must be undertaken by client to detemine controls, PPE & exclusion zones.					
 30. Can CHEMICALS create a hazard? Leaking from plant Splashing Explosion PPE considerations Spill kit considerations 	Y			Potential Hazard	Please refer to Operator Manual.					

04 On eventery TD Albiblio /	1						
 31. Operator TRAINING / QUALIFICATIONS? Training requirements Qualification requirements Competency assessments Documentation Operator's manual Equipment experience 	Y		Operation by persons who are not suitably qualified or experienced may result in injury to person, damage to property, and may also void insurance cover.	Earth moving machinery may only be moved and serviced only by persons who meet the following requirements:			
 Equipment experience Product knowledge 				 18 years or older. 			
				 Physically and mentally suited for this work. 			
				• Persons have been instructed in driving and servicing the earth moving machinery and have proven their qualifications to the owner/contractor			
				• Persons are expected to perform work reliably. • They have been appointed by the contractor for driving and servicing the earth moving machinery.			
				• They are informed on and follow the legal regulations of the relevant authority.			
				All operators must completely read and understand the Operator Manual			

Potential Hazards	ŀ	lazar		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Y	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
					prior to operating plant. Undertake a Job Safety and Environmental Analysis before use of plant, and use to determine that the relevant safety procedures are in place before commencing					
					work.					
32. Are there <u>ANY OTHER</u> potential hazards generated by or during the use of this item of plant and/or any	Y			Plant Failure	Pre – Operational Inspection	D	DAILY - Operators must complete Start-up checklist	E		
attachments?							Operation checklist			
							Parking Checklist			

ALL OPERATORS OF THE PLANT OR EQUIPMENT MUST BE BRIEFED ON THE PLANT HAZARD ASSESSMENT (PHA) PRIOR TO FIRST TIME USE.

ANY RELEVANT CONDITIONS WHICH MAY IMPACT ON THE OPERATION OF THIS ITEM OF PLANT OR EQUIPMENT MUST BE TRANSFERRED TO THE AMS/TRA.
