

Portable Shower

Safety Precautions

- Ensure shower unit is positioned on level, stable ground, away from slopes, trenches or pits.
- Ensure all fittings and placement of the unit do not hinder the movement of the door.
- **Wet surfaces can be slippery.** Use caution to reduce the risk of slipping in the shower unit.
- **Danger of burns/scalding** - carefully set the water temperature and check temperature before entering shower.
- **Electricity & water do not mix!** Keep all electrical appliances and sources away from water. Do not take any electrically powered objects inside the shower enclosure.
- Exercise caution when closing the doors to avoid crush injury (e.g. fingers).
- **Drowning** can occur in as little as 5cm of water, or ½ a cup of water in the lungs. Do not allow small children, impaired or disabled persons to shower unattended.
- Ensure adequate ventilation and regular cleaning to avoid the build up of bacteria or mould.
