

Assessment Number: 1			Assessment Date: 9/9/20
Plant Type: Portable Shower Plant Make: Plant Model:			Assessment Facilitated by: Leigh Evans (Admin/Accounts Manager)
Asset/Fleet/Rego No: SHWR Plant Serial No.		/	Assessment Participants: Lachlan Horton (Yard Manager)
Plant Owner Name: Northern Hire Group		I	nitial Assessment Follow up Assessment (See below)
Follow up based on change to:			
Use of plant 🗌 System of work 🗌 Plant	Environme	ent 🗌	New or additional information Plant through modification
Is the plant designed to perform the task?	Yes X	No 🗌	
Has the plant been modified from the original condition?	Yes 🗌	No X	
Is the plant in good working condition and free of weeds & mud?	Yes X	No 🗌	
All identified action items closed out/addressed (plant checks)?	Yes X	No 🗌	
Is the plant safe to operate? (On completion of PHA and action closure)	Yes X	No 🗌	
			Date: Signature:

Risk / Opportunity Rating Table (see Risk Management Consultation

<u>Process Appendix</u> for a full description of Risk Consequence, Opportunity Consequence and Likelihood Ratings)

Action and Approval Scheme

These suggested timings and tolerance levels in the Action Table will be overridden by specific policies of the company that either dictate shorter timeframes for corrective action or zero tolerance. For example, the company has a zero tolerance policy for Safety and Environmental risks.

The decision to tolerate a risk or capture a opportunity should be based on a consideration of:

Whether the risk / opportunity is being controlled to a level that is reasonably achievable;

Whether it would be cost-effective to further control risk or capture the opportunity;

Whether the user wishes to tolerate risks / opportunities of that type

Action Table

Residual risk / opp level	Suggested action	Timing of status report and management plans	Authority for continued toleration or improvement of residual rating.
A	Take action to eliminate or implement additional controls to reduce it to acceptable level (ALARP/SFAIRP). "Onsite activities" – Intolerable and activity must not commence	Report as soon as practicable. Normally within hours.	Senior Executive Manager Plus Project Manager / Project Leadership Team
В	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Corporate Management review	Manage and re-evaluate risk / opportunity to allow reporting days Manage and re-evaluate risk / opportunity to allow reporting every two weeks	General Manager and / or Project Manager / Project Leadership Team
с	Implement additional controls reduce it to ALARP/SFAIRP. "Onsite activities" – must not commence without Site Management review	Manage and re-evaluate risk / opportunity to allow reporting monthly	"Specialist" Manager, eg Construction or Design Manager
D	Will still require attention within existing operations to reduce to ALARP/SFAIRP. "Onsite Activities" – Site Management must determine appropriate level of management and supervision prior to commencement of activity	Manage and re-evaluate risk / opportunity to allow reporting every quarter	Team Leader
E	Lower priority. May be tolerable.	Monitor, manage and carryout activity in accordance with identified controls	Supervisor

Revision No: 1

Potential Hazards	I	laza		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk Level	New or Additional Controls Action	Action Verified as Complete: (Name and
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	Date)
1. Are there any specific warnings or conditions (manufacturers or other) relating to potential hazards from the operation of the item of plant?	Y			Potential Hazard	Refer to Shower Safety Precautions (attached) A site specific					
 Refer to technical or operating manuals, SOPs, safe use instructions List any relevant safety warning hazards & controls 					risk assessment should be conducted to determine safe placement					
2. Are there any <u>COMMUNICATION</u> requirements in relation to the safe operation of the plant?		N								
 Active signalling processes. Point to point communications. Whistle Spotter (with/without whistles) Flag signalling Labels and signage 										
 Can anyone be <u>ENTANGLED</u> in the plant? 		N								
 Hair or other body parts caught in moving parts PPE caught in moving parts Isolation devices Warning decals Guarding Rotating parts Emergency stops 										

Potential Hazards	I	Haza	-	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 4. Can anyone be CRUSHED or TRAPPED? (e.g. through unexpected movement, lack of capability for plant or equipment to be slowed, stopped or immobilised, plant tipping or rolling, being thrown from plant) Emergency stop (E Stop) Service or parking brake Battery isolator ROPs/FOPS Being crushed between moving parts Unexpected movement Neutral Start Reversing/travel alarm Warning horn Amber flashing beacon Rear swing warning lights Pedals non slip surface Appropriate controls Rear view mirror Seat belt Door inter locks Crush zone decals Guarding devices Mandatory secondary protection device installed on all boomtype MEWP 	Y			Death or serious injury from unexpected movement of building	Ensure that all operators follow approved SWMS/ SOP when loading and unloading the unit to and from a flat top truck or trailer, low loader or tilt tray. Exclusion zones will be required and a site specific risk assessment must be undertaken onsite to determine extent of controls High risk Construction work requires the creation and consultation on SWMS –refer to local requirements. Refer to transport load restraint guide or transport SOP/SWMS to determine proper securing of container in transit.					

Potential Hazards	ł	lazar N	d N/	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required on Plant	Final Risk Level	New or Additional Controls Action By:	Action Verified as Complete: (Name and
5. Can anyone be CUT, STABBED or PUNCTURED?	T	N	A						(Name and Date)	Date)
 Flying objects Moving parts Pinch points Sharp edges Isolation devices Warning decals Guarding 										
 6. Can SHEARING occur? Between two moving and rotating parts Between fixed and moving parts Warning decals Guarding 		Ζ								
 7. Can ABRASION, TEARING or STRETCHING occur? Continuous contact with moving parts Warning decals Guarding Pulling/pushing 		Ν								

Potential Hazards	ŀ	Hazar	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 8. Can anyone be STRUCK whilst operating the plant? Plant disintegrating Mobility of plant travelling Reversing/travel alarm Amber flashing beacon Work pieces thrown out Moving parts Warning decals Guarding 	Y			Potential Hazard during loading/unloading/movement on site	Ensure that all operators follow approved SWMS/ SOP when loading and unloading the unit to and from a flat top truck or trailer, low loader or tilt tray. Exclusion zones and PPE (goggles, mask, protective clothing) will be required and site specific a risk assessment must be undertaken to determine PPE and controls.					
 9. Can a hazardous PRESSURE be produced? Hydraulic hoses Radiator Come into contact with fluids under high pressure 		N								
 10. Can an ELECTRICAL hazard be created? Lack of insulation Contact with electrical conductors Poor earthing Water near equipment Lack of isolation Warning decals 	Y			Potential Hazard	Refer to Shower Safety Precautions (attached)					

Revision No: 1

Potential Hazards	1	Hazaı	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A		Controlo		on Plant	Level	By: (Name and Date)	(Name and Date)
 11. Can an EXPLOSION or LOSS OF CONTENTS occur? Gas emission, Dusts Vapours, lubricants Fuel tank Storage of haz chemicals/ DG's near plant Warning decals Ejection of workpiece Collapse or fragmentation 	Y			Potential Hazard – LPG Gas powered Hot Water Service	Cylinder should be checked regularly for leaks. Avoid heat, sparks, open flames and other ignition sources. Use of safe work practices are recommended to avoid eye or skin contact and inhalation					
 12. Can anyone using or near the plant SLIP, TRIP or FALL? Uneven surface Fall from a height Weather conditions Slippery surfaces 	Y			Potential Hazard	Ensure building is positioned on level stable ground and properly secured. Ensure the steps are clean. Refer to Shower Safety Precautions (attached)					
 13. Are there ERGONOMIC MANUAL HANDLING hazards associated with the plant? Poor posture Repetitive or sustained movements Awkward positions Strained movements Poorly designed seating Access and egress Access for maintenance Routine inspections and adjustments 		N								Page 7 of 15

Revision No: 1

When printed this document is an uncontrolled version and must be checked against the IMS electronic version for validity

Potential Hazards	ł	Hazar		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
14. Are there ERGONOMIC - OPERATING CONTROL hazards associated with the plant?		Ν								
 Difficult to understand Inappropriate colouring Function not identified Inappropriate controls & switches Access and egress Labelling of controls and indicators Variation in operators Operation by two or more persons 										
 15. Are there specific requirements for ISOLATION of energy sources? Hydraulic pressure Compressed gases Electrical feeds/capacitors Motive power systems Suspended loads 		N								
 Operation by two or more persons 16. Can unplanned LOSS of POWER create a hazard? Engine shutdown Loss of electrical supply Loss of steering systems Ability to apply brakes and stop Ability to lower suspended loads 		N								

Revision No: 1

Potential Hazards	ł	Hazaı	rd	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 17. Can anyone be SUFFOCATED? Lack of oxygen Contaminated atmosphere Confined spaces Spaces where air flow is inadequate 	Y			Potential Hazard	Ensure adequate ventilation in and around unit. Gas cylinder should be checked regularly for leaks.					
 18. Does operation of the plant cause extreme TEMPERATURE changes? Fire Burns through conduction Convection Cryogenic burns Operation in extreme heat or cold 	Y			Potential Hazard – burns/ scalding	Check water temperature prior to entering shower. Cylinder should be checked regularly for leaks.					
 19. Can a FIRE occur? Friction Ingress of materials/fluids Build-up of materials/lubricants Fuels Fire extinguisher 	Y			Potential Hazard – LPG Gas powered Hot Water Service	Cylinder should be checked regularly for leaks. Avoid heat, sparks, open flames and other ignition sources					

Potential Hazards	I	Hazaı		Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
 20. Can certain WEATHER conditions create a hazard? Hypothermia / extreme cold Heat stroke / extreme hot Wet conditions Electrical storms Dirt & mud on roads at egress points 	Y			Potential Hazard	Ensure unit is positioned on level stable ground and properly secured to avoid slippage. Ensure building is not positioned within areas prone to flooding.					
 21. Does VIBRATION of the plant create a hazard? Plant becomes unstable Causes physical problems for the operator whilst operating Vibration of equipment Operation could cause unacceptable vibration levels in nearby structures 		N								
 22. Can the plant emit toxic FUMES or VAPOURS? Exhaust fumes Chemicals Haz chemicals/DG's 23. Carry out NOISE survey 		N	N/							
 on page 14. Is the plant noisy? Emit >85 dBA at the operator Effects operator communication Noise impacts on community during out-of-hours work (including reversing beepers) 			A							

Potential Hazards	ŀ	lazar	ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
24. Carry out the LIGHT survey on page 14. Is there poor visibility			N/ A							
 At the controls At the task Darkens surrounding areas Light impacts on community or sensitive natural environment during out-of-hours work 										
25. Does the plant emit RADIATION?		N								
Eg X-raysEMR										
• Laser										
26. Can operation of the plant create DUST?			N/ A							
 Explosive atmosphere Breathing hazard Reduced visibility Nuisance dust at nearby community Impact on local flora and fauna Loss of topsoil and spread of weeds and pathogens 27. Can the plant become 										
UNSTABLE during operation? • Working on uneven / unstable	Y			Potential Hazard	Ensure unit is positioned on level stable ground and properly secured					
ground Shifting load Lack of plant support Outriggers					A site specific risk assessment must be undertaken by client onsite to determine PPE and controls					

Revision No: 1

Potential Hazards	ł	Hazaı	-	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
28. Could LOSS of LOAD			NI/							
occur?			N/ A							
			^							
 Failure of ropes/slings 										
 Overloading 										
 Entanglement in surrounding 										
structures										
Maintenance requirements										
29. Is there anything in the	Y			Potential Hazard	A site specific					
SURROUNDING	-				risk assessment					
ENVIRONMENT that					must be					
may produce a hazard?					undertaken by					
					client to					
Power lines					detemine					
Low ceiling					controls, PPE &					
 Other plant 					exclusion zones.					
 Storage areas 										
 Co-located equipment 										
 Isolation requirements 										
 Potential for flash flooding if 										
operating adjacent to waterways										
 Operating in known areas of 										
weeds, pathogens or										
contamination										
 Operating in sensitive 										
environments requiring										
protection from offsite										
weeds/pathogens or spills										
30. Can CHEMICALS create		NI								
a hazard?		Ν								
Leaking from plant										
 Splashing 	1									
 Explosion 										
 PPE considerations 										
 Spill kit considerations 										

Potential Hazards	Hazard		ď	Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required	Final Risk	New or Additional Controls Action	Action Verified as Complete:
	Υ	Ν	N/ A				on Plant	Level	By: (Name and Date)	(Name and Date)
31. Operator TRAINING / QUALIFICATIONS?			N/ A							
 Training requirements Qualification requirements Competency assessments Documentation Operator's manual Equipment experience Product knowledge 										
32. Are there <u>ANY OTHER</u> potential hazards generated by or during the use of this item of plant and/or any attachments?		Ν								

ALL OPERATORS OF THE PLANT OR EQUIPMENT MUST BE BRIEFED ON THE PLANT HAZARD ASSESSMENT (PHA) PRIOR TO FIRST TIME USE.

ANY RELEVANT CONDITIONS WHICH MAY IMPACT ON THE OPERATION OF THIS ITEM OF PLANT OR EQUIPMENT MUST BE TRANSFERRED TO THE AMS/TRA.
