

## PORTABLE HAND WASH STATION

### **Instructions for Use**

Empty weight approx. 35kg.

*Use safe manual handling/lifting techniques when moving, ie. 2 persons to lift, or use mechanical aids.*

#### **Installation/Set up Procedure:**

1. Place handwash station on flat stable ground
2. Fill freshwater tank at fill point

#### **To Operate**

1. To wash, place hands under the waterspout
2. Depress the foot pump several times for desired amount of water

#### **Pack up Procedure**

1. Release the fresh water from the tank by removing the fresh water drain plug and draining into a suitable area (or container for disposal).
2. Releasing grey water:
  - a. Where permitted, grey water can be expelled directly from the grey water tank by removing the grey water drain plug and draining into a suitable area.
  - b. For environmentally sensitive areas, or areas where expelling of grey water is not permitted, the grey water can be sucked from the tank via the grey water inspection point into a suitable container for disposal.
