

# STATIC Plant Hazard & Risk Assessment

<b>Assessment Number:</b> HELI24	<b>Assessment Date:</b> 7/2/24
<b>Plant Type:</b> Power Trowel 24" <b>Plant Make:</b> Crommelins <b>Plant Model:</b> CPT24RP  <b>Asset/Fleet/Rego No:</b> HELI24 <b>Plant Serial No.</b>	<b>Assessment Facilitated by:</b> Leigh Evans (Admin/Accounts Manager)  <b>Assessment Participants:</b> Chris Feldbauer (Director)
<b>Plant Owner Name:</b> Northern Hire Group	<b>Follow up Assessment</b> (See below for Revision No.)
<b>Site/Job Specific Assessment Required?</b> YES  When completing the checklist, consider the hazards that may affect: <ul style="list-style-type: none"> <li>• plant operators</li> <li>• anyone working, or in the vicinity of, the plant</li> <li>• others who could be affected, such as visitors, pedestrians, contractors, etc.</li> </ul>	

Is the plant designed to perform the task?      Yes      ~~No~~

Has the plant been modified from the original condition?      ~~Yes~~      No

Is the plant in good working condition and free of weeds & mud?      Yes      ~~No~~

All identified action items closed out/addressed (plant checks)?      Yes      ~~No~~

Is the plant safe to operate? (On completion of PHA and action closure)      Yes      ~~No~~

**Date:** 7/2/24

**Signature:**

# STATIC Plant Hazard & Risk Assessment

This document has been developed as a guide to identify hazards on plant only.

This Risk Assessment has been conducted to the guidelines as detailed in the Worksafe booklet "Plant Hazard Checklist"

**Workplace hazards have not been identified.**

Job safety analysis (J.S.A) - Safe Work Method Statement (SWMS) is required to identify workplace hazards.

Operators must take into account Job Safety Analysis when operating mobile plant.

This assessment is conducted under a static condition as per Occupational Health & Safety Regulations Victoria 2017. A site specific assessment should be conducted at each change of location. Refer to Plant Regulations/National Standards for Plant (NOHSC).

## Action and Approval Scheme

These suggested timings and tolerance levels in the Action Table will be overridden by specific policies of the company that either dictate shorter timeframes

for corrective action or zero tolerance. For example, the company has a zero tolerance policy for Safety and Environmental risks.

The decision to tolerate a risk or capture a opportunity should be based on a consideration of:

- Whether the risk / opportunity is being controlled to a level that is reasonably achievable;
- Whether it would be cost-effective to further control risk or capture the opportunity;
- Whether the user wishes to tolerate risks / opportunities of that type

**Disclaimer:**

This Plant Hazard & Risk Assessment does not eliminate the Owner/Operator responsibility to maintain the Mobile Plant as per OH & S Regulations Victoria 2017/National Standards for Plant (NOHSC).

This assessment provides information that is based on an inspection that was made on the date noted on the assessment cover sheet. If any addition, alteration or modification has been made to this mobile item plant subsequent to that date, it may not confirm to a satisfactory level of acceptance.

All hazards identified in this document must be rectified within 21 days of date listed on this form.

If faults are not rectified in 21 days, this document becomes null and void.

I acknowledge receipt of the complete Assessment for the Plant item detailed on the cover sheet.

**Supervisor/Operator Name:** .....

**Supervisor/Operator Signature:**.....

**Date:**        /        /

# STATIC Plant Hazard & Risk Assessment

	A	B	C	D	E
1	H	H	H	M	M
2	H	H	M	M	L
3	H	M	M	L	L
4	M	M	L	L	L
5	M	L	L	L	L

  

Hazard Risk Assessment	
<b>H</b>	High Risk - INTOLERABLE (Significant & Urgent Action(s) required - Immediate Action)
<b>M</b>	Medium Risk (Reduce risk to ALARP - As Low As Reasonably Practicable)
<b>L</b>	Low Risk - Tolerable (monitor and manage risk)

  

Likelihood of Occurrence	Severity of Result
1. Expected to occur (once per week)	A. Fatality
2. Common (once per month)	B. Permanent Disability
3. Rarely (once in < 20 years)	C. Lost Time Injury (LTI)
5. Highly unlikely (once in > 20 years)	D. Medical Treatment/Damage
	E. First Aid Injury

	Y	N	N/A							
<p><b>9. Can a hazardous PRESSURE be produced?</b></p> <ul style="list-style-type: none"> <li>Hydraulic hoses</li> <li>Radiator</li> <li>Come into contact with fluids under high pressure</li> </ul>	Y			Potential injury from contact with fluids	Ensure all warning decals are in place.  Perform daily pre-operation checks  Ensure pipe clamps are fitted to all hoses/pipes  Avoid contact with heated fluids or fluids under pressure  Allow plant to fully cool before refuelling or checking fluid levels	M				
<p><b>10. Can an ELECTRICAL hazard be created?</b></p> <ul style="list-style-type: none"> <li>Lack of insulation</li> <li>Contact with electrical conductors</li> <li>Poor earthing</li> <li>Water near equipment</li> <li>Lack of isolation</li> <li>Warning decals</li> </ul>		N								

# STATIC Plant Hazard & Risk Assessment

Potential Hazards	Hazard			Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required on Plant	Final Risk Level	New or Additional Controls Action By: (Name and Date)	Action Verified as Complete: (Name and Date)
	Y	N	N/A							
<b>11. Can an EXPLOSION or LOSS OF CONTENTS occur?</b> <ul style="list-style-type: none"> <li>▪ Gas emission,</li> <li>▪ Dusts</li> <li>▪ Vapours, lubricants</li> <li>▪ Fuel tank</li> <li>▪ Storage of haz chemicals/ DG's near plant</li> <li>▪ Warning decals</li> <li>▪ Ejection of workpiece</li> <li>▪ Collapse or fragmentation</li> </ul>	Y			Injury from battery explosion, or ignition of flammable fluids	Ensure all warning decals and guards are in place.  Perform daily pre-operation checks					
<b>12. Can anyone using or near the plant SLIP, TRIP or FALL?</b> <ul style="list-style-type: none"> <li>▪ Uneven surface</li> <li>▪ Fall from a height</li> <li>▪ Weather conditions</li> <li>▪ Slippery surfaces</li> </ul>	Y			Potential hazard (site specific)	A site specific risk assessment must be undertaken by client prior to operating.	L				
<b>13. Are there ERGONOMIC - MANUAL HANDLING hazards associated with the plant?</b> <ul style="list-style-type: none"> <li>▪ Poor posture</li> <li>▪ Repetitive or sustained movements</li> <li>▪ Awkward positions</li> <li>▪ Strained movements</li> <li>▪ Poorly designed seating</li> <li>▪ Access and egress</li> <li>▪ Access for maintenance</li> <li>▪ Routine inspections and adjustments</li> </ul>	Y			Injury from repetitive movements, poor posture and/or awkward positions	Ensure operator is in comfortable position and all control levers are easily identifiable and within comfortable reach  Operators to take regular rest breaks	L				

# STATIC Plant Hazard & Risk Assessment

Potential Hazards	Hazard			Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required on Plant	Final Risk Level	New or Additional Controls Action By: (Name and Date)	Action Verified as Complete: (Name and Date)
	Y	N	N/A							
<p><b>14. Are there ERGONOMIC - OPERATING CONTROL hazards associated with the plant?</b></p> <ul style="list-style-type: none"> <li>▪ Difficult to understand</li> <li>▪ Inappropriate colouring</li> <li>▪ Function not identified</li> <li>▪ Inappropriate controls &amp; switches</li> <li>▪ Access and egress</li> <li>▪ Labelling of controls and indicators</li> <li>▪ Variation in operators</li> <li>▪ Operation by two or more persons</li> </ul>	Y			Potential hazard	Ensure all controls are easily identified and readable	L				
<p><b>15. Are there specific requirements for ISOLATION of energy sources?</b></p> <ul style="list-style-type: none"> <li>▪ Hydraulic pressure</li> <li>▪ Compressed gases</li> <li>▪ Electrical feeds/capacitors</li> <li>▪ Motive power systems</li> <li>▪ Suspended loads</li> <li>▪ Operation by two or more persons</li> </ul>	Y			Injury from contact with energy sources	Ensure all operators are familiar with safety precautions associated with energy sources  Ensure battery isolator fitted	L				
<p><b>16. Can unplanned LOSS of POWER create a hazard?</b></p> <ul style="list-style-type: none"> <li>▪ Engine shutdown</li> <li>▪ Loss of electrical supply</li> <li>▪ Loss of steering systems</li> <li>▪ Ability to apply brakes and stop</li> <li>▪ Ability to lower suspended loads</li> </ul>	Y			Potential Hazard	Perform daily pre-operation checks and ensure plant is maintained in accordance with the manufacturers recommendd schedules					

# STATIC Plant Hazard & Risk Assessment

Potential Hazards	Hazard			Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required on Plant	Final Risk Level	New or Additional Controls Action By: (Name and Date)	Action Verified as Complete: (Name and Date)
	Y	N	N/A							
<b>17. Can anyone be SUFFOCATED?</b> <ul style="list-style-type: none"> <li>▪ Lack of oxygen</li> <li>▪ Contaminated atmosphere</li> <li>▪ Confined spaces</li> <li>▪ Spaces where air flow is inadequate</li> </ul>		N								
<b>18. Does operation of the plant cause extreme TEMPERATURE changes?</b> <ul style="list-style-type: none"> <li>▪ Fire</li> <li>▪ Burns through conduction</li> <li>▪ Convection</li> <li>▪ Cryogenic burns</li> <li>▪ Operation in extreme heat or cold</li> </ul>		N								
<b>19. Can a FIRE occur?</b> <ul style="list-style-type: none"> <li>▪ Friction</li> <li>▪ Ingress of materials/fluids</li> <li>▪ Build-up of materials/lubricants</li> <li>▪ Fuels</li> <li>▪ Fire extinguisher</li> </ul>	Y			Injury to persons/damage to property	Turn off engine and allow machine to cool before refuelling.  Ensure fuels are stored correctly and away from ignition sources.  Friction heat can cause fire. Use only as directed on non flammable materials.	H				

# STATIC Plant Hazard & Risk Assessment

Potential Hazards	Hazard			Describe Hazard	Controls	Current Risk Level	New or Additional Controls Required on Plant	Final Risk Level	New or Additional Controls Action By: (Name and Date)	Action Verified as Complete: (Name and Date)
	Y	N	N/A							
<b>20. Can certain WEATHER conditions create a hazard?</b> <ul style="list-style-type: none"> <li>▪ Hypothermia / extreme cold</li> <li>▪ Heat stroke / extreme hot</li> <li>▪ Wet conditions</li> <li>▪ Electrical storms</li> <li>▪ Dirt &amp; mud on roads at egress points</li> </ul>	Y			Potential injury from exposure to extreme weather conditions	Ensure adequate ventilation and/or air conditioning.  Observe local weather conditions and warnings	L				
<b>21. Does VIBRATION of the plant create a hazard?</b> <ul style="list-style-type: none"> <li>▪ Plant becomes unstable</li> <li>▪ Causes physical problems for the operator whilst operating</li> <li>▪ Vibration of equipment</li> <li>▪ Operation could cause unacceptable vibration levels in nearby structures</li> </ul>	Y			Injury from exposure to hand-arm-vibration	Ensure correct use of PPE  Operators to take regular rest breaks	L				
<b>22. Can the plant emit toxic FUMES or VAPOURS?</b> <ul style="list-style-type: none"> <li>▪ Exhaust fumes</li> <li>▪ Chemicals</li> <li>▪ Haz chemicals/DG's</li> </ul>	Y			Injury from exposure to exhaust fumes and/or cleaning chemicals	Use in a well ventilated area only.  Ensure correct use of PPE	L				
<b>23. Carry out NOISE survey on page 14. Is the plant noisy?</b> <ul style="list-style-type: none"> <li>▪ Emit &gt;85 dBA at the operator</li> <li>▪ Effects operator communication</li> <li>▪ Noise impacts on community during out-of-hours work (including reversing beepers)</li> </ul>	Y			Injury from prolonged use	Ensure operators use appropriate PPE, including hearing protection.  A site specific assessment is required to determine noise impacts on surrounding community.					

# STATIC Plant Hazard & Risk Assessment

# STATIC Plant Hazard & Risk Assessment

*This Hazard Identification and Risk Assessment has been prepared based on several key assumptions:*

- 1. That all examples of the plant currently in service are as per their original specification.*
- 2. That all examples of the plant have not been modified in any way without the prior written consent of the manufacturer or owner.*
- 3. That all examples of the plant are operated and maintained in accordance with the Manufacturer's Instructions and with all applicable statutory requirements.*

*Northern Hire Group have made every attempt to identify all reasonable foreseeable operating circumstances in preparing this assessment, however no guarantee as to the completeness of this Assessment is provided or implied.*

*You should always check any applicable legislation and make your own judgement about what action you may need to take to ensure you have complied with the law.*

*It is the responsibility of the Employer, Contractor, Operator(s) to assess and identify any site or operation specific hazard associated with the use of this equipment specifically applicable to the task to be carried out and to where the equipment is to be used or located. They must assess the risk potential for each of the identified hazards and ensure that all reasonably practicable steps are undertaken to ensure those risks are effectively controlled.*

*All operators must be trained and competent in the use of this plant and hold appropriate qualifications as required by applicable regulatory requirements.*

*Operators of the plant to which this Risk Assessment refers must read and understand the instructions for Use and Warnings contained in the Operator Manual, or supplied with this Assessment, prior to use.*

*All daily Pre-Start checks, Routine and Periodic Inspections, Maintenance and Repairs to this plant must be carried out in accordance with the requirements of applicable Australian Standards.*

## NOTES:
